Exam : **220-1002**

Title : **CompTIA A+ Certification**
Exam: Core 2

Version : **DEMO**

1.Which of the following is a reason to use WEP over WPA?

- A. Device compatibility
- B. Increased security
- C. TACACS
- D. Multifactor authentication

Answer: A

Explanation:

WEP (Wired Equivalent Privacy) was introduced when the 802.11 standard for Wi-Fi networks was launched. It allows the use of a 64-bit or 128-bit key. However, researchers discovered vulnerabilities in WEP in 2001 and proved that it was possible to break into any WEP network by using a brute-force method to decipher the key. Using WEP is not recommended.

WPA, which stands for Wi-Fi Protected Access, is a newer standard and is much more secure.

2.Which of the following types of scripts would be seen on the user end of a web page?

- A. .bat
- B. .js
- C. .sh
- D. .vbs

Answer: D
