Title : Adobe Experience Manager Cloud Service Migration Expert

Version : DEMO

1.During the design phase, you discover that a significant number of components in the client's current AEM environment rely on deprecated APIs.
What is the best course of action?
A. Deploy the components without modification
B. Refactor the components using supported APIs and tools like BPA
C. Replace all deprecated components with out-of-the-box alternatives
D. Migrate the components directly to a staging environment for testing
Answer: B

2.In the process of assessing users, groups, and permissions for migration in AEM Cloud Service, consider a scenario where a large enterprise with multiple business units and regional teams is undergoing migration. The organization has diverse user roles with varying levels of permissions in the current AEM instance.
Which factors should be taken into account to comprehensively assess and determine the migration of users, groups, and permissions?
A. Conduct a quick survey among users to identify their preferred permissions in the new AEM Cloud Service environment, and migrate users and groups accordingly to meet their expectations.
B. Automatically migrate all users and groups, then manually review and adjust permissions post-migration based on the feedback received from business unit leaders.
C. Exclude users with administrative roles from the migration process, assuming that these roles will be re-assigned in the new AEM Cloud Service environment. Migrate only content-related users and groups.
D. Analyze the existing user roles and permissions, considering the specific needs of each business unit and regional team. Identify and document any custom permissions or unique user roles that may require special handling during migration.
Answer: D

3.What is the primary goal of reviewing deprecated capabilities in an AEM migration?
A. To eliminate all legacy workflows
B. To determine compatibility with AEM as a Cloud Service
C. To reduce the overall migration timeline
D. To prepare for caching optimizations
Answer: B

4.How is the effective configuration determined when multiple configurations for the same PID are applicable based on runmodes?
A. Random selection
B. Configuration with the lowest number of matching runmodes
C. Alphabetical order
D. Configuration with the highest number of matching runmodes
Answer: D

5.Which steps are essential when preparing configurations for Asset Microservices? (Choose three)
A. Define custom rendition profiles
B. Audit existing asset metadata

C. Configure synchronous replication for assets
D. Set up asset processing workflows
E. Optimize metadata extraction rules
Answer: ABE
