Exam : **C_BCBTP_2502**

Title : SAP Certified Associate -
Positioning SAP Business
Technology Platform as part
of SAP Business Suite

Version : DEMO

1.What is the primary role of SAP Business Technology Platform (SAP BTP) within the SAP ecosystem?

- A. It provides a cloud-based infrastructure for hosting third-party applications
- B. It serves as the foundation for SAP's integration, data management, analytics, and AI capabilities
- C. It is a customer relationship management (CRM) tool designed for SAP S/4HANA
- D. It functions exclusively as a middleware solution for connecting legacy systems

Answer: B

Explanation:

SAP BTP enables businesses to integrate, extend, and analyze data using SAP and third-party applications. It provides AI, analytics, and database management to enhance business processes.

2.Which of the following key components are part of SAP BTP? (Choose two)

- A. SAP HANA Cloud
- B. SAP Ariba
- C. SAP Integration Suite
- D. SAP Concur

Answer: A, C

Explanation:

SAP HANA Cloud provides database and analytics capabilities, while SAP Integration Suite enables seamless connectivity between SAP and non-SAP systems. Other options belong to different SAP solutions.

3.Which benefit does SAP BTP offer organizations adopting a cloud strategy?

- A. Eliminates the need for hybrid cloud deployment
- B. Enables data-driven decision-making through AI and analytics
- C. Restricts integration to only SAP-based applications
- D. Replaces the need for on-premise ERP systems

Answer: B

Explanation:

SAP BTP provides AI-powered insights, analytics, and seamless integration, helping organizations make informed business decisions while supporting hybrid and multi-cloud strategies.

4.Why is SAP BTP considered a strategic platform for digital transformation?

- A. It allows enterprises to move all workloads to SAP on-premise solutions
- B. It centralizes integration, automation, and data-driven decision-making
- C. It eliminates the need for external data management solutions
- D. It provides a one-size-fits-all solution without customization options

Answer: B

Explanation:

SAP BTP facilitates a unified environment for integration, process automation, and AI-powered analytics, helping businesses drive digital transformation efficiently.

5.Which of the following capabilities does SAP BTP provide? (Choose two)

- A. Data and analytics
- B. Direct procurement and supplier management

C. Business application development

D. Physical hardware infrastructure

Answer: A, C

Explanation:

SAP BTP supports data and analytics for intelligent insights and provides tools for low-code/no-code application development, helping businesses build and extend applications efficiently.
