1.Which of the following are leading practices regarding the Source Tracker functionality? Note: There are 3 correct answers to this question.

- A. Before a recruiter manually posts a job online, they should generate a tracking link from Recruiting > Source Tracker > Campaign URL Builder.
- B. Enable your customer's Source Tracker options from Command Center.
- C. When setting up the Source Tracker for your customer, always enable all possible sources.
- D. Adding a tracking link enables reporting in Advanced Analytics for manually posted jobs.
- E. If a source that the customer requests is NOT available to enable in the Site Source Editor, submit a support ticket to request that the source be created.

Answer: A B D

2.Move to Production

When moving a Career Site Builder site to production, which four XML files must you export for the move to production?

- A. Content pages, Category pages, Job Layouts, Career Site Builder Settings
- B. Site Settings, Career Site Builder Settings, Category pages, Translations
- C. Candidate Profile, Site Settings, Translations, Category pages
- D. Site Settings, Career Site Builder Settings, Content pages, Translations

Answer: B

Explanation:

Option B is correct because when moving a Career Site Builder site to production, you need to export four XML files: Site Settings, Career Site Builder Settings, Category pages, and Translations¹. These files contain the configuration and content of your site, such as the site name, URL, logo, theme, layout, language, categories, and pages¹.

Option A is incorrect because Content pages and Job Layouts are not required to export for the move to production. Content pages are automatically generated from the Category pages, and Job Layouts are part of the Career Site Builder Settings¹.

Option C is incorrect because Candidate Profile is not an XML file that can be exported from Career Site Builder. Candidate Profile is a feature that allows candidates to create and manage their profiles on the career site.

Option D is incorrect because Content pages are not required to export for the move to production, as explained above.
