Exam : **EAPA_2025**

Title : ArcGIS Pro Associate 2025

Version : DEMO

1.Which tool should be used to set the coordinate system of a raster dataset that is currently unknown?
A. Project
B. Define Projection
C. Project Raster
Answer: B
Explanation:
Reference Topics Covered:
• ArcGIS Pro – Data Management → Defining spatial reference
• ArcGIS Pro – Raster Functions and Georeferencing Workflows
• ArcGIS Pro – Geoprocessing Tool Help (Define Projection vs Project Raster)
• ArcGIS Pro Certification Study Guide – Data Management Domain

2.A GIS analyst is trying to conduct overlay analysis using the Union tool but is unable to run the tool due to a red X in one of the parameters.
A. The input features do not geometrically intersect.
B. The environment settings for Processing Extent do not include the participating features.
C. Both input features are not polygon feature classes.
Answer: B

3.A GIS analyst is trying to do some maintenance and clear up space as it relates to geodatabases while keeping editing capabilities intact.
Which tool should the analyst use?
A. Compress
B. Compress File Geodatabase Data
C. Compact
Answer: C

4.A GIS analyst has a standalone table that includes the change in population by county and a layer of counties.
Which method should the GIS analyst use to visualize the change using symbology?
A. Relate the table and layer based on the county field.
B. Join the table and layer based on the county field.
C. Add a spatial join between the table and layer.
Answer: B

5.A GIS intern is examining two feature classes to determine whether there are any differences in the geometry, attributes, and spatial reference.
Which geoprocessing tool should the intern use?
A. File Compare
B. Table Compare
C. Feature Compare
Answer: C
