Exam : **HPE2-B11**

Title : HPE Solutions with Virtualized Data Center

Version : DEMO

1.A customer completed migration validation but found that monitoring alerts still point to old workload locations.
What should be updated?
A. Monitoring configuration
B. Migration wave names
C. Project meeting notes
D. Source server labels
Answer: A

2.A customer is deploying Exchange and SQL Server on the same HPE platform. Each workload has different recovery and performance needs.
What should the architect recommend?
A. Workload-specific policies
B. One policy for all systems
C. No recovery tiers
D. Random resource allocation
Answer: A

3.A customer's VMware administrators want to simplify hardware lifecycle operations across multiple clusters.
Which HPE solution value should be emphasized?
A. Consistent lifecycle management
B. Manual host-by-host tracking
C. No firmware governance process
D. Separate procedures for each cluster
Answer: A

4.A customer is implementing Microsoft workloads on HPE infrastructure. The design includes compute and storage, but identity integration and monitoring are not documented.
What is the main concern?
A. Operations integration is incomplete
B. Compute sizing is always invalid
C. Storage cannot support Microsoft
D. Identity services are optional
Answer: A

5.A customer asks why it should run Microsoft workloads on HPE infrastructure instead of continuing with aging hardware.
Which response is strongest?
A. It improves supportability
B. It removes all planning
C. It avoids all upgrades
D. It skips workload review
Answer: A
