5. A mid-sized customer is having trouble deciding between a controllerless Aruba solution and a controller-based one.

What can you explain to the customer about how Aruba protects the company's investment?

- A. The same Aruba APs can be deployed in controllerless Instant mode and then later changed to controlled mode.
- B. Aruba offers a buy-back program for controllerless Instant APs, making it cost effective to later deploy controlled APs.
- C. There is no difference in features and capabilities between a controllerless and controller-based Aruba solution.
- D. Aruba uses a cloud subscription-based licensing model for controllerless APs, and these licenses can be upgraded to controller licenses.

Answer: B
